## **DETAILED ACTION**

### **Reason For Allowance**

1. Claims 3-8, 10-13, 16-19 and 21-41 are allowed.
2. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 3, 7, 19, 21, 25, 30 and 39, which include (claim 3) a flow control element disposed within a second tubing between a first tubing and a reservoir, with the flow control element configured to be actuated between a first state allowing fluid flow in the second tubing in any direction, and a second state restricting fluid in the second tubing from the reservoir to the first tubing; (claim 7) a fluid volume measuring device configured to measure the volume of fluid passed into first and second tubings by a fluid motive apparatus; (claims 19, 25) a sensor and a fiber optic cable; (claim 21) a cable and sensor that are adapted to be moved from a first location to a second location through a first tubing; (claim 30) a conduit that contains a communication cable and a sensor the cable and sensor adapted to be deployed through the conduit from a first location to a second location; (claim 39) a cable and a sensor through a conduit extending into the well from a first location to a second location in the conduit , in combination with providing a barrier fluid assembly containing a barrier fluid to isolate well fluids from fluid in the conduit with the barrier fluid.
